- V. Discussion on moving forward with the traffic construction project-**

- A. Lisa explained that the problem with pickup is not that it takes too long to pick up their child, that the problem is that parents show up way too early and do not want to park so it backs up on to 29 road. She informed them that each day the school times the pickup and from 4:00-4:15 90% of our population is dismissed and exited with just a few parents who pickup between 4:15-4:20.**
- 1. Jeremiah proposed a few different ideas to move vehicle congestion from the front of the school to around the school if they are just picking up a middle school student.**
  - 2. Jeremiah proposed another idea to open up the south gate connected to the corporation land to allow parents who want to park access to the south parking lot. Brad explained that this option would not be safe nor best practice in keeping the corporation and school separate. He added that the road leading to the SOuth parking lot is not in good condition and would need a lot of work.**
- B. The board reviewed the proposed plans for altering the dropoff and pickup loop to accommodate more cars and a more efficient drop-off and pick-up routine. They discussed plans that could be put into place sooner, and plans that could be developed long term. Our preliminary look at CMAS is very positive - it is evident our school sustained no learning loss and made gains in some areas - our science score is 30 points over the state average / 40 over the district - we went down a few point in middle school ELA but that I can chalk up to variance as we are still 10 points above the district and state average.
